

Chocolate milk is the “official” beverage of New Hampshire high school athletics.

The New Hampshire dairy industry impacts state and local economies with more than \$141 million in total output, 3,717 jobs and more than \$19 million in labor income.

Drink more milk; consume more dairy. Not only is it good for your health, but in doing so you help preserve open space.

60-70% of the state’s crop land is managed or maintained by dairy farmers.

When you purchase milk at the grocery store, only 30% of the price you pay gets back to farmers.

Milk is a regional product. New Hampshire’s dairy farmers supply, in part, to brands you purchase at the grocery store.

Farm numbers increased in New Hampshire by 24% from the last Agricultural Census to the most recent (2007 census—the Ag Census is conducted every 5 years). There are just under 4,200 farms in the state.

New Hampshire is #1 in the nation for percentage of farms with direct-to-consumer marketing sales.

New Hampshire is #1 in the nation for organic sales as a percentage of all agricultural sales.

Farms reporting some type of agri-tourism activity as part of their business increased by 82% from the 2002-2007 Ag Census.
